Hw Assignment #4: Go to Google.com

#### Step 1: Identify the problem

I have a research task to finish by tonight. In order to complete the task, I must use a search engine to obtain valuable information and data that can allow me to complete my task. "Go to google.com" can do exactly that.

#### Step 2: What do I need to know

To go to google.com:

- What device is needed? Does it have internet access?
- Does the device have a web browser? For ex: chrome, explorer, safari, etc.
- Does it have a search function to access all types of data?
- What is the purpose of going to google.com?

#### Step 3: Address the questions + Data collection

Device: I am using a macbook pro with internet capabilities.

Web Browsers: My device has access to browsers such as chrome, explorer, and safari.

Search Function: There are URLs and address bars to be able to navigate and search the web.

Purpose: I am going to google.com to find information about my research project.

#### Step 4: Data Organization

Purpose: Retrieving information for a research task.

Requirements: Having access to Macbook Pro, Google Chrome, and Wi-fi.

Accessibility: Enter google.com in the web browser → enter queries afterwards to find information.

#### Step 5: Find and Identify the Relationship

Cause: I have a research task to complete that requires information retrieval through web browsers.

Effect: I navigate to google.com to use a search engine to obtain the data I need to complete the research task.

## Step 6: Find the Solution

The steps needed to “go to google.com” is

- Have access to a device that also ensures stable internet connection
- Open up a web browser on the device you're using
- Enter the URL “google.com” in the search engine and press enter
- Type in the queries on google to find the necessary information

## Step 7: Presentation/Tell the story

I have a research task due by midnight tonight. This task heavily relies on data retrieval to be able to complete hence I would need to use a search engine. I boot up my Macbook Pro and ensure it is connected to my home Wi-fi. It has access to chrome which I will be using. I enter “google.com” into the web browser. Finally I type in the queries into google that will show what type of information I am looking for to complete my research task.
