Hw Assignment #5: Put on a coat

Step 1: Identify the problem

We are in the winter season and I wanna go ice skating with my family. However, the weather is freezing outside and I need to warm up a bit.

Step 2: What do I need to know

To put on a coat:

-How cold is the weather outside? (how thick the coat should be)
-What type of coat should I bring to accommodate the weather? (overcoat or jacket)
-Where am I going? (knowing what the temperature of the place is like)

Step 3: Address the questions + Data collection

Weather Conditions: We are currently in the winter season, outdoors is rainy weather.
Settings: Going to an ice skating park dressed casually with family members.
Type of Coat: There is a mix of jackets and overcoats being used within our family for this casual event to celebrate.

Step 4: Data Organization

Weather Conditions: Winter season, Raining outdoors, Approximately 34 degrees F.
Settings: Outdoor Ice skating park, Casual dressing code.
Types of coat: Jackets and overcoats.

Step 5: Identify the relationship

Cause: We are going outdoors during the winter on a chilly raining day.
Effect: We must put on a jacket or an overcoat to stay warm due to unfavorable weather conditions.

Step 6: Find the solution

The steps needed to "put on a coat" is
-know where you are going to ensure what the weather is like beforehand.
-During winter seasons, cold rainy days, chilling/ freezing days.
-to stay warm and protect yourself from catching a cold/getting allergies.
-knowing how thick of a coat you need.

Step 7: Tell the story

My family and I had been planning to go to an ice skating park for a while now. We are now in the winter season and it just so happens that the day we plan to go is raining. The setting takes place outdoors and is really casual. In order to protect myself from catching a cold or getting allergies, I put on a jacket before heading outside as the weather conditions are typically about 34 degrees F.
